

## Products | winter footwear

### 1. General info

Kuoma® winter footwear is extremely warm and light and very comfortable to wear. All shoes have durable shock absorbing outsoles also in cold winter weather. In addition, all shoes have changeable insoles and nearly all models reflective strips that enhance safety. The textile uppers of winter boots repel dirt and moisture. Kuoma® footwear is suitable for outdoor activities even in very cold weather.

The best modern, light, insulating and water repellent materials have been selected for the popular kuoma® footwear. Together with modern manufacturing technology the materials enable the production of high quality winter footwear.

### 2. Models

There are many models of kuoma® winter footwear: boots with or without velcro fastening, boots with snowlock as well as hikers with velcro or lace fastening. Kuoma® shoes are manufactured for all age groups, children, women and men. The smallest size manufactured is 19 and the biggest 49. The models for children are designed to be easy to put on and to give support for children's feet. For women there are models both with narrower or wider last, and some models have an outsole with graceful form.

### 3. Care instructions

A moist fabric is recommended for cleaning kuoma® winter footwear. The winter footwear with textile upper is also machine washable but washing instructions need to be carefully followed. The washing and drying temperatures must not exceed 40°C. Separate washing instructions are fastened to shoes that are washable.

### 4. Detailed information about kuoma

1. All models feature durable leather or microfibre reinforcements impregnated against damp.
2. The sturdy, durable, hardwearing, flexible, thermally insulated PU outsole is moulded directly on to the upper to bond better than a glued outsole. The profile of the outsole is designed especially to reduce the risk of slipping.
3. Warm, removable insole with rough under surface to prevent "rolling" under the foot.
4. Hardwearing, durable, moisture and dirt repellent surface material.
5. Elastic heel counter bonded straight on to the outsole for heel support.
6. 3M-Scotchlite® reflective strips front and back for extra safety.
7. Clear size label with name space (children's models).
8. Layer of thermal insulation foam, with closed cell structure to prevent water absorption, under surface material (product dries quickly).
9. Warm, durable quality inner lining made of pile.
10. Double stitching to provide extra strength in seams subject to tough wear and tear.

**Machine or hand washable.** Drying and washing temperature **40°C max.** Shoes made of nubuck and felt boots do not tolerate washing. Separate washing instructions are fastened to shoes that are washable.
